

Emerald Network

The biggest software release in Emerald history

Launching October 2024

Emerald Network is a centralised platform to manage your network of Emerald products, install sites, and customer information. With real-time notifications and advanced troubleshooting capabilities, it reduces downtime, so you can operate with effortless efficiency.

Greater visibility

Real-time monitoring of all your Emerald installs from one unified control hub.

Customer service

Improve your customer support, by quickly identifying, diagnosing and troubleshooting errors.

Boost business efficiency

Centralised platform for businesses to manage Emerald products including heat pumps, devices, install sites, and customers.
